

What is the process for users paying for listings with PaymentsPlus?

Written by Administrator

PaymentsPlus follows the add listing structure originally designed by Mosets and just adds in its own procedures. Users are required to place a listing first by following the Add Listing links found in the category where they want to place a listing. After placing a listing they are redirected to "My Page" (PaymentsPlus calls this My Listings Management}. On the My Listings Management they will then see the payment options available. If paying by PayPal the listing will be automatically published on successful payment being received. However, for Off-Line Payments Admin will need to manually approve the listing when they (admin) receives the payment or approves a free listing. This is done via your Joomla back end at PaymentsPlus > Manage Subscriptions.

If you want to see how the whole process works, then please go to the [PaymentsPlus Demo](#) .
