In your PaymentsPlus Control Panel you'll see something like this: **PaymentsPlus Version 2.15© 2009 all rights reserved.**

Current available version is PaymentsPlus 2.20

Released under the GNU/GPL License Ver 2. This will alert you when new releases are available and alleviates the need for us to send out notifications that could be seen as spam. The first line shows the version you have installed and the second shows the current available version. The new version number is an image that is sourced from the PaymentsPlus server as new versions are available we update this accordingly.
