

What happens if I approve listings in Mtree instead of PaymentsPlus?

The problem with approving listings in MTree it bypasses the PaymentsPlus process and doesn't add the values in PaymentsPlus that is needed to perform the listings count. You should therefore only approve listings using PaymentsPlus Manage Subscriptions.

If you are adding Listings as Admin in MTree and need a subscription applied against it, then add it first in MTree but don't approve or publish. Then go to PP Manage Subscriptions to create a new subscription, locate the new listing and apply the subscription and publishing settings accordingly.
